

HOME SAFETY MANAGEMENT

INTRODUCTION:

- **Purpose:** To provide a secure environment using IoT technology.
- **Scope:** For safeguarding the lives around us by using advanced features
- **Definationations:**

Sensors: Devices used detect the change in the environment.

AI:Artificial Intelligence

- **References:**

IoT concepts,AI textbooks

Overall Description:

- **Product perspective:** To ensure safety and security of the people and proper utilization of the AI.
- **Product Feature:** Sensors,detectors and alarm messages pops up on the owner's ph.no
- **User charecteristics:**

To understand the instructions.

Proper utilization of resources
- **Constraints:**

Detect hazards, send instant alerts

Features:

Sensory devices

CCTV camera surveillance

24/7 protection

External Interface requirements:

Detect hazards, send instant alerts, trigger alarms automatically

Functional requirements:

cameras, alarms, mobile app, web portal, Wi-Fi/Bluetooth communication.

Non-functional requirements:

The system should respond quickly

Other requirements:

safety standards, support for firmware
